

Laboratory for Mechanics of Materials and Nanostructures
Empa - Materials Science & Technology
Feuerwerkstr. 39
CH-3602 Thun

Job Opportunities

for scientists with a degree in physics, chemistry or materials science to participate in one of the research areas of the laboratory. The possibility of taking part in a PhD program is available. Additional job opportunities can be found at the site of www.telejob.ch

Job opportunities in the following subjects are currently available:

- **nanomechanics of metal nanowires**
- **size effects in small-scale materials**
- **nanostructuring via charged particle beams**
- **nanostructuring via electroplating**
- **tip enhanced Raman spectroscopy**

Our laboratory offers an international and interdisciplinary research environment. No detailed description of any job opportunities is listed explicitly. If you are interested in collaborating in one of the research areas or if you want further information about possible topics, please contact our laboratory using this email-address: johann.michler@empa.ch.
